PROFESSIONAL PROFILE

Biomedical Engineering diploma trainee who has completed coursework at Eldoret Technical Training Institute and is awaiting formal graduation and certificate issuance. Completed industrial attachment at Nanyuki Teaching and Referral Hospital. Has foundational knowledge of medical equipment, maintenance principles, troubleshooting and equipment safety, and is seeking supervised practical experience in a hospital biomedical engineering team.

EDUCATION

Diploma in Biomedical Engineering — Eldoret Technical Training Institute
Coursework completed; awaiting formal graduation and diploma certificate (expected November 2026).

INDUSTRIAL ATTACHMENT

Nanyuki Teaching and Referral Hospital | September–November 2025

- Gained exposure to the hospital technical environment and medical equipment.
- Familiarized with patient monitoring, diathermy, suction and neonatal equipment.
- Observed the importance of equipment functionality, maintenance and patient safety.

TECHNICAL KNOWLEDGE

- **Monitoring and diagnostic:** ECG, patient monitors, blood pressure monitors and pulse oximeters.
- **Operating theatre and critical care:** diathermy, suction machines, defibrillators and theatre lights.
- **Maternity and neonatal:** incubators and phototherapy equipment.
- **Laboratory and imaging:** cell counters, microscopes, ultrasound and water purification systems.
- **Physiotherapy:** foundational knowledge of interferential therapy and iontophoresis equipment.

ADDITIONAL TECHNICAL KNOWLEDGE

- Basic electrical principles and systems.
- Foundational knowledge of refrigeration and air-conditioning systems.
- Basic refraction knowledge.

PROFESSIONAL STRENGTHS

- Interest in preventive maintenance, troubleshooting and equipment safety.
- Willingness to learn, follow instructions and work under supervision.
- Technical curiosity, independent learning and problem-solving.

CAREER OBJECTIVE

To build practical competence in medical equipment maintenance, safety checks, troubleshooting and healthcare technology support while contributing responsibly to a hospital team.
